IPSG Technology is WBE Canada Certified: YES

Company Overview and Core Competencies

IPSG Technology is a certified woman owned "leading edge" technology company. We specialize in Digital Transformation, Custom Application Development, System Selection and Implementation (of ERP, CRM, Payroll, HR, e-Commerce), and Web Services. IPSG also provides Business and Technology Consulting Services across various industries in Canada and the United States.

Our Differentiator's

People. We have an elite team of technology professionals with decades of experience.

Reputation. Our solid reputation has allowed us to maintain a client retention rate of 99%.

Client Partners. We have strong trusted client relationships and support them through thick and thin.

Facility Security Clearance. Federal Government Secret Clearance and Protected B Clearance.

Cost Savings. Our solution delivers cost savings back to the pockets of our client partners.

Client Testimonials

Testimonial #1:

For years IPSG has delivered application development and web services projects on time, they never say "NO" they just get it done, even if we ask at the last minute. There have been times when the team worked on weekends, they deliver quality solution and never let us down.

Public Sector – Central Canada, April 2021

Testimonial #2:

The experience with IPSG was fantastic, the entire team was very dedicated and involved, working through the entire process to present a functional solution to our issues. The weekly meetings were great at keeping everyone on the same page, and the communication throughout the process was done very well also. I don't have any critiques or things to improve on, everything went very well, complete on time and budget. The differentiating factors I would say comes down to the quickness and responsiveness of the team, as well as the strong technical backing and years of experience some other firms lack in.

Private Sector – Atlantic Canada, May 2021
