## OUR SERVICES

**Digital Transformation:** We work with you to develop your digital transformation strategy and road map and then we work with you throughout the implementation to ensure success.

**Application Design & Development:** Based on your needs, we listen to capture and document your requirements, then we design, develop and implement your custom application.

**System Selection & Implementation:** We work with you to capture your requirements to find, select and implement the right solution that will meet your requirements. (ERP, HR, Payroll, CRM and E-commerce).

**Web Services & Hosting:** We understand your environment, capture your requirements, document your specifications, then we design, develop, implement and manage your website in a secure hosted environment in both official languages.

**Business & Technology Consulting Services:** Qualified supplier of IT and Business contingent labor.

## TESTIMONIALS

Our experience working with IPSG was fantastic, the entire team was very dedicated and involved, working through the entire process to present a functional solution to our issues. The weekly meetings were great at keeping everyone on the same page, and the communication throughout the process was done very well. I don't have any critiques or things to improve on, everything went very well, complete on time and budget. The differentiating factors I would say comes down to the quickness and responsiveness of the team, as well as the strong technical backing and years of experience some other firms lack in.

### Private Sector – Atlantic Canada, May 2021

For years the IPSG team has work with us in the delivery of application development and web services projects, even if we ask at the last minute, they never say “NO” they can't do it, they just get it done. There have been many times when the team worked on weekends to help us meet critical deadlines, they always deliver quality work and never let us down.
